

XIII International Rice Conference for Latin America and the Caribbean

Yusaku Uga
Speaker

Topic:
**"Genetic improvement of rice for
low use of inputs"**

He is the principal researcher of
Institute of Crop Science, National
Agriculture and Food Research
Organization.

He is also the visiting professor of
Department of International Agricultural
Development, Tokyo University of
Agriculture.

Yusaku's research aims are to identify
and apply QTLs associated with root
system architecture for genomic-based
breeding to improve crop production
under abiotic stress like drought and
nitrogen deficiency.
